## SAFETY INSTRUCTIONS

### FIRE DRILL

Please take the time to read the following information:

Hotel Aiglon has a highly sophisticated fire alarm system that offers guests excellent protection.

There are smoke detectors throughout the entire building plus automatic back-up lights in case of a power cut. There are also fire extinguishers throughout the entire building. The smoke evacuation systems are in the roof. In case of fire, all the doors to the stairwell are fireproof and open in the evacuation direction and close naturally to protect guests all the way out.

Once in your room, please remember to look at the evacuation plan (back of door to your room). It includes safety instructions, evacuation routes and the emergency exits. Look for markers between your room and the emergency exits (useful in case of reduced visibility or smoke). Also locate the fire alarms in your corridor (small red boxes on the walls).

### WHAT TO DO IN CASE OF FIRE

Dial 9 to inform the front desk of the fire. Front desk staff are regularly trained about what to do in case of fire. Close all doors and windows near the fire to stop fire from spreading. If you are far from a telephone, break the glass of one of the red fire alarms. Do not attempt to put the fire out. Leave the building as quickly as possible, leave all luggage behind.

### IN CASE OF FIRE IN YOUR ROOM

Leave your room immediately and close the door behind you, as well as any windows you can reach to stop fire from spreading. Then sound the alarm quickly (tell the front desk or break the glass of one of the red fire alarms). This will help staff control the fire as quickly as possible.

### YOU HEAR THE FIRE ALARM OR PEOPLE SHOUTING, « AU FEU! »

Go to the door of your room and place the palm of your hand on it.

If the handle is hot, do not open the door. If you see flames or smoke coming in under the door, do not open the door: the air movement would increase the flames and put you in danger. In case the corridor that leads to the stairwell appears dangerous, stay in your room, close all doors.

The doors are fireproof. Place wet towels at the bottom of the door to your room to increase air tightness. If the phone works, dial 9 to inform the front desk that you are blocked in your room. Show yourself at the window and wait for the fire brigade.

If the handle is cold and no smoke is coming under the door to your room, open the door slowly and exit quickly. Leave all luggage behind. Close the door behind you to stop the fire from spreading and to protect your belongings.

Note: Smoke in the corridor does not stop you from leaving; simply stay low and move on all-fours. However, if the smoke is coming in under the door to your room, it means that the entire corridor is filled with smoke. In this case, stay in your room and wait for help to arrive.

## **EVACUATION**

Head towards the nearest emergency exit by following the green lights above the doors.

If there is smoke in the corridor, walk on all-fours. In heat and flames, the cooler air is near the ground. Move along the walls to find an emergency exit more easily. Never use the lift during an evacuation, unless disabled (wheelchair).

Go down to the ground floor. Always hold onto the handrail as you descend (safer and easier).

If the nearest emergency exit is blocked, head towards the next one. If this alternative is not possible, shut yourself in the nearest room.

Once on the ground floor, go to the meeting point (left on exiting the hotel) in front of the gym. Watch out for traffic.

## **DON'T FORGET!**

- In case of fire, please keep calm and inform the front desk immediately.
- Never use the lifts
- Walk on all-fours in heat and flames (heat rises)
- Do not open a door if smoke is coming in under it
- Never enter a smoke-filled room
- Never go back
- Never run (asphyxiation risk)
- Leave all luggage behind
